

## **Title: Jaypee launches new Bar Cutting Machine**

To meet the needs of Construction Equipment market Jaypee has recently launched its new model C 28 of Bar Cutting Machines.

This innovative machine is a smart thing, equipped with small, 3 HP Electric Motor, and the Single Phase power input which makes it useful every where even places with no access to 3 phase connection.

The maximum diameter of reinforcing bar which can be transformed by this model is 28 mm can cut at the same time three rebars with maximum diameter of 8 mm.

C 28 from JAYMAC®, Jaypee's registered brand, is work force which can be used without break, for a round-the-clock operation.

This small but powerful Bar Cutter shears steel rods amazingly fast to ensure that your steel yard is used efficiently.
